Galvanised Laser Welded Duct

ADS's longitudinally Laser Welded Ducts are made from B500 quality sheet in sheet thickness 0.75-1.00mm. The sheet is hot-galvanised with a zinc coating of minimum 275g/m². All diameter measurements are internal. Our smooth interior bore and modular capability allows greater flexibility in the design and installation of a system, without compromising system pressure through leakage or air turbulence inside the duct.

Diameter: 80-400mm
